- Responsive Web Design

Expert Mobile developer and Frontend Engineer.

Engineer valued for driving high-performance accessible web and mobile experiences. I design quality, user-friendly and scalable products regardless of stack.

## Experience

I've worked on a handful of web and mobile projects over the past 5 years, some of which were for the following organizations:

### Raven Livestream — Mobile Developer

Sept 2020 - Present

I worked on and orchestrated the Livestreaming feature of the Raven Mobile application.

- Built the Livestream feature of the mobile application using Agora's SDK and Sockets.
- Implemented Picture-in-Picture mode by communicating with Native code.
- Audited and improved design, accessibility and overall experience of the product.
- Worked with the Backend Developer to consume API's and implement functionality.
- Transformed high level design pixel perfectly to code.
- Wrote standard architectural and reusable code making using of best practices.

### Fixme — Mobile Developer (Contractor)

Nov 2020 – June 2021

I worked with Fixme as a senior contractor to rebuilt their mobile application.

- Rebuilt the company's mobile application using the Flutter framework.
- Built a multi-role user authentication system.
- Communicated effectively with project managers and the team.
- Introduced a consistent coding style across the application.
- Delivered an overall fast, yet accessible and silky smooth user experience in the app.

### Coco Neobank — Mobile Developer (Intern)

June 2020 – August 2021

I interned with Coco Neobank as a mobile developer. Built a couple of apps powered by the Flutter framework and Google's firebase.

- Developed a multi-purpose utility mobile application with a currency converter and QR code scanner.
- Developed an anti-addiction application using gamification as a method.
- Uploaded an app on Google's Playstore.
- Enforced healthy codebases, coding style and standards.
- Wrote widget level and architecture level tests for applications.

### Palace Petroleum — Frontend Developer (Contractor)

March 2019 – August 2019

I developed the frontend infrastructure, design and functionality for their web application using HTML, CSS and PHP.

- Developed the Company's Landing Page using HTML and CSS.
- Built the web application dashboard, and added multiple functionalities ranging from adding, updating and deleting data from tables.

## Projects

Links to some of my work can be found on [github.com/emmanueljoshua](https://github.com/emmanueljoshua) and details can be provided upon request via a schedule

## Education

### National Institute of Information Technology

January 2017 – Sept 2020

Software Engineering (MMS).

— Sango Ota, Ogun State. Nigeria

## Certifications

### Professional Diploma in Information Technology

January 2020 – July 2020

— National Institute of Information Technology

### Advanced Diploma in Information Technology

May 2019 – Dec 2019

— National Institute of Information Technology

### Honors Diploma in Information Technology

August 2017 – July 2018

— National Institute of Information Technology

### Advanced Certificate in Information Technology

January 2017 – June 2017

— National Institute of Information Technology
